ANG Basis Add-On

SMART EXTENSION FOR SAP BUSINESS ONE

The ANG Basis Add-On extends the SAP standard with important functions that increase efficiency and accuracy in the management of business partners and articles. In particular, it offers extended master data information, a VAT ID check in accordance with German and Austrian regulations, and a confirmation of arrival.

These functions provide valuable support for companies that depend on precise and legally compliant management.

KEY FEATURES OF THE ANG BASIS ADD-ON

The ANG Basis Add-On clearly displays all relevant article information such as prices, discounts, and availability, and provides a central overview of business partner data, including sales and receipts.

Particularly noteworthy is the integrated UID number check, which enables fast and legally compliant verification directly from the business partner master. In addition, currency imports from the European Central Bank are automatically imported into SAP, which simplifies currency conversion.

ADVANTAGES OF THE ANG BASIS ADD-ON

Advanced functionalities: The add-on offers advanced master data and document information that simplifies the management of business partners and articles.

Logging: All checks and processes, such as VAT ID number verification, are logged and can be accessed at any time, ensuring complete traceability.

Automated checks: The VAT ID check in accordance with German and Austrian regulations ensures legally compliant management of VAT ID numbers.

Easy integration: The add-on integrates seamlessly into SAP Business One and offers a user-friendly interface that simplifies everyday work.
