COBI.time

EFFICIENT TIME TRACKING FOR YOUR COMPANY

COBI.time is the flexible solution for SAP Business One that makes time recording easy—in the office or on the go. Work, break, and project times can be quickly recorded, while automatic integration avoids duplication of work.

Optimize your processes, increase efficiency, and keep track of everything—with COBI.time.

KEY FEATURES OF COBI.time

[COBISOFT]

COBI.time offers a comprehensive solution for time recording and absence management. It enables manual recording of working and project times as well as management of absences such as vacation or illness. With functions for user management, posting to cost centers, and team and role filters, organization can be made efficient.

Integration with SAP Business One allows employee data to be imported, and approval processes facilitate the management of requests and absences. By evaluating target and actual times and providing a flexible attendance list, COBI.time supports transparent and efficient work processes.
