THE SOLUTION FOR YOUR MOBILE WAREHOUSE PROCESSES

Increase the efficiency of your warehouse logistics with COBI.wms, the powerful add-on for SAP Business One. The mobile solution enables quick implementation, simplifies processes, and saves time by allowing direct bookings from the warehouse.

Avoid duplication of work and paperwork while increasing your productivity with a user-friendly, flexible, and multilingual interface.

KEY FEATURES OF COBI.wms

[CÖBISOFT]

COBI.wms offers a modern, mobile solution for warehouse management directly in SAP Business One. All warehouse processes, such as goods receipt, stock transfer, and returns, can be handled quickly and easily. You can track stock in real time, make plus and minus postings, and create orders and delivery notes.

Picking and inventory are efficiently supported, and thanks to integrated label printing, product labeling always remains correct. With COBI.wms, you can optimize your warehouse logistics, save time, and avoid duplication of work.

ADVANTAGES OF COBI.WMS

Quick commissioning and flexibility: The solution is ready for use in less than a day, and modules can be flexibly locked and unlocked per device or user.

Barcode scanning and label printing: Easy scanning via smartphone camera or Android scanner, as well as printing of labels, packing lists, and NVEs on delivery notes.

Advanced search and storage options: Dynamic search function, support for storage locations (bins), as well as batch and serial numbers for complete traceability.

Compatibility and integration: Supports the GS1 barcode standard, interfaces to BarcodeShipping, and a wide range of hardware such as Honeywell, Panasonic, Zebra, and DataLogic.

Customized adaptations: Individual special functions, branding, and multi-client capability for a tailor-made solution.
