

# Candis

## DIGITAL INVOICING ADD-ON FOR SAP BUSINESS ONE

Candis automates your accounts payable and integrates seamlessly with SAP Business One. From invoice receipt and digital approval to audit-proof archiving, Candis ensures consistent processes—transparent, efficient, and GoBD-compliant.

Thanks to intelligent workflows, AI-supported document recognition, and direct SAP integration, you can reduce your accounting workload in the long term, lower costs, and gain valuable time.

## DIE WICHTIGSTEN FUNKTIONEN VON CANDIS

With Candis, you can digitize your company's entire invoice workflow. The software **captures incoming invoices** via email or upload and **extracts relevant information using AI**, including checking for duplicates or formal errors. All invoices can be processed quickly and in compliance with regulations via **individually configurable approval processes** – even on the go. The **central, GoBD-compliant archive** ensures legally compliant storage for 10 years and makes all documents retrievable at any time.

Thanks to **direct integration with SAP Business One**, vendor master data, cost centers, posting accounts, and purchase order references are automatically reconciled and transferred—without media discontinuity. **Expenses and travel costs** can be digitally recorded and managed via the same interface. As an extension, Candis offers its **own company credit cards**, which can be used to centrally control payments, limits, and document management. This creates a continuous digital accounting process – from document to payment.

## BENEFITS OF CANDIS

**Complete automation:** From document recognition to SAP export—all steps are automated, standardized, and scalable.

**Legal certainty and compliance:** GoBD-compliant archiving, German servers, data protection in accordance with GDPR—tested and certified.

**SAP Business One integration:** Seamless connection for master data, postings, and invoice approvals – without double entry.

**Efficient collaboration:** Intelligent workflows and transparent approval processes – ideal for distributed teams and mobile working.

**Fast implementation & easy operation:** Ready to use in just a few days – intuitive, browser-based, and usable without extensive training.
