# SAP B1 Usability Package

INDIVIDUAL CUSTOMIZING FOR SAP BUSINESS ONE

Standard is a thing of the past – with the **B1 Usability Package (B1UP)**, you can get the most out of your SAP Business One. This flexible extension from **Boyum IT** makes your ERP system smarter, more efficient, and perfectly tailored to your daily processes.

Design processes, masks, and workflows to suit how you and your team actually work. Whether automation, validation, or dashboards – B1UP gives you the freedom to customize SAP Business One without any programming effort.

KEY FEATURES OF THE B1 USABILITY PACKAGE

The B1 Usability Package **extends SAP Business One** with numerous functions that allow you to customize, automate, and simplify your ERP system. User-defined fields, validations, and workflows can be easily **configured**—without in-depth IT knowledge. Recurring tasks such as sending, saving, or printing documents can be **automated**.

B1UP also offers interactive dashboards and reports for **data-driven decision-making**. Thanks to integration with Outlook and tools such as MailChimp**, communication and collaboration** are mapped directly in the system. This allows you to create a flexible, **user-friendly** SAP Business One that grows with your requirements.

ADVANTAGES OF THE B1 USABILITY PACKAGE

Automation: Routine tasks such as sending emails, printing, or entering data run automatically – freeing up valuable time for your team to focus on more important tasks.

Higher data quality: Intelligent validations and rules ensure that all data is correct and complete – for reliable decisions.

Easy customization without programming: With just a few clicks, you can customize masks, fields, or processes—without any IT effort or external developers.

Better decisions thanks to dashboards: Interactive evaluations and reports give you a real-time overview of key figures, projects, and business processes.

Greater efficiency: Whether sales, purchasing, finance, or service—every department benefits from a user-friendly, flexible SAP interface.
